

17th-18th June 2008, Geneva, Switzerland

Items on the meetings agenda include an assessment of the status of transboundary waters in the UNECE region and metadata database on transboundary waters under the Convention. INWEB coordinator Prof. J. Ganoulis will present a WEB-based database system of transboundary aquifers in the South East Europe (SEE) and also in the Euro-Mediterranean Partnership countries, highlighting the lessons learned that should be taken into account in designing the Convention metadatabase.
