

30th-31st October 2008, Brussels, Belgium

The objectives of this final conference of the SPI-Water project were to help bridge the gap between scientific knowledge and water policy implementation, to present the enhanced WISE-RTD Web Portal as a tool for sharing water related research information and operational practices and to facilitate the transfer of WFD and IWRM experiences within EU and towards non-EU countries. The conference was attended by INWEB Chair coordinator Prof. J. Ganoulis.
