

25th-29th October 2010, Langkawi, Malaysia

Together with the IEMES 2010 - 4th International Exhibition on Materials, Equipment and Services for Coastal Environmental Projects

Organised by the MWWD organisation

MWWD provides an opportunity for scientists, engineers, producers, contractors and operators to present and discuss development in their professional activities, with emphasis on scientific and technical multi-disciplinary issues related to the coastal environment.

Papers cover the scientific aspects of the marine environment and its protection, the planning, design and installation and operation of sealines, treatment, power and desalination coastal plants, the design and construction of coastal works.

UNESCO Chair/INWEB coordinator, Prof. J. Ganoulis, presented a paper on Risk Analysis of Sea Outfalls, and also gave a series of presentations and seminars at the Institute for Environment and Development (LESTARI), at the National University of Malaysia, UKM, in Kuala Lumpur.
