

Water and Climate Day at COP21 convened representatives of UNESCO's Water Family from the International Hydrological Programme (IHP), World Water Assessment Programme (WWAP), UNESCO-IHE Institute for Water Education, water centres, and water chairs to discuss water and climate related issues and solutions. Eight sessions at the UNESCO Pavilion focused on specific water-related themes to address climate change including groundwater, water at schools, data tools and methodologies, water quality, transboundary water governance, capacity development, and cooperation.
